

Role Profile

Job Title: Electrical Apprentice - Whitley
Department: Engineering
Reports To: Multi Site Engineering Manager
Ref: Ref-309 , V1 – 01 July 2024

Role Overview

As an Electrical Apprentice in the Engineering Department, you'll acquire workshop exposure alongside maintenance engineers who will offer guidance and mentorship. This team holds a pivotal role in maintaining the operational efficiency of our growing, harvesting, processing and production equipment. You'll contribute hands-on technical assistance, aiding in assembly, installations, and equipment commissioning and maintenance, all while honing your fault-finding, programming, and diagnostic abilities.

Monaghan and Doncaster College are working in close partnership to ensure the apprentice is provided with an excellent opportunity to be successful. The company is offering an opportunity to work with engineers who are passionate about people and engineering.

Main Duties

Maintain health, safety and hygiene standards as a number one priority in accordance with company rules and regulations

As our Engineering Apprentice, we'll help you to become qualified so you can:

- Carry out planned preventative maintenance
- Provide maintenance of equipment
- Modify, test, and inspect condition-based monitoring and fault finding with our systems
- Help improve systems on our sites where required
- Work on technology which monitors and controls all aspects of processes and their performance across the site
- Carry out risk assessments and method statements to ensure activities are always completed in a safe manner

In addition:

- Position, assemble, install and dismantle mechanical plant and equipment which may include pumps, valves, gearboxes, pipework, to agreed specifications
- Carry out planned, unplanned and preventative maintenance procedures on mechanical plant and equipment
- Replace, repair or remove components in mechanical plant and equipment and ensure its return to operational condition
- Diagnose and determine the cause of faults in mechanical plant and equipment

Experience and Qualifications

- 4/C or above in Maths and a Science and a Level: 4/C or above in English (or equivalent)
- Show a keen interest in exploring and applying new technologies.
- Possess proficient verbal and written communication skills in English.

Other Role Requirements:

- Show an interest in engineering
- Be a logical problem solver
- Capable of effective prioritization of tasks and personal time management
- Excels in team environments.

Performing the role in line with the Monaghan Cultural Values:

1. We do the right thing: We use this philosophy to drive every aspect of our business, from product, to process to people.
2. Forward Thinking: We think ahead and we think for the long term.
3. Down to Earth: We understand the importance of communicating our discoveries in a straightforward way.
4. Inspiring: We seek out new ways to excite and inspire each other.
5. Egalitarian: We have always been grounded in the belief that everyone is equal. That everyone deserves an equal chance to speak, be heard and make an impact.
